CHAIRMAN'S STATEMENT

REPORT AND FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2006

I am pleased to announce the Company's audited results for the year to 31 December 2006.

Turnover for the year almost doubled to US\$3.5 million compared to US\$1.8 Million for the full year 2005. Gross profit increased by 196% to US\$1.3 million (2005: US\$439,000) with gross profit margins increased to 37% (2005: 23%). Our operational loss, excluding exchange rate differences, was \$1,991,000 compared to a like for like operating loss in 2005 of \$2,989,000, an improvement of 33.4%.

The new contract wins that we announced recently, combined with our new business pipeline, provide confidence that we will see further strong growth in 2007. To date we have processed \$2.5 million of orders from our customers. Following our increased geographical reach into France, Brazil and Mexico, as well as enhancing our presence in the USA, we will look to broaden our distribution networks even further afield.

A significant development in the period has been the deployment of our state of the art, award winning mobile DVR (The IVG series) in 175 buses in Brazil. The Board is confident that, upon completion of this initial project, we can expect further major orders for our IVG products.

I am also pleased to announce that our R&D team has managed to develop and improve our HVG series. This professional cost effective product, will now have four video channels and will be competitive on price. I am confident that SerVision will gain penetration into the SME and retail markets and we are currently considering various routes to market.

SerVision continues to make steady progress towards achieving its goals and we look forward to the future with confidence. On a personal note, I would like to thank all of our dedicated staff for their loyalty and hard work throughout the period that was essential for our significant progress and growth.

SERVISION PLC

NOTES TO THE REPORT AND FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2006

1. ACCOUNTING POLICIES

The accounting policies, applied on a consistent basis in the preparation of the financial information, are as follows:

(a) Basis of Preparation and Going Concern

The financial statements are prepared on the historical cost basis in accordance with the applicable accounting standards. The financial statements are prepared under UK GAAP.

Although the company has net liabilities, the financial statements are prepared on a going concern basis as the directors are in the process of raising funds, through the issue of shares, that they believe to be sufficient to allow them to meet their creditors as and when they fall due. Further to this, Mr Gideon Tahan, an executive director, has personally guaranteed to support the company for up to \$1,000,000, to be drawn down, by the company, if required.

(b) Basis of Consolidation

Subsidiary undertakings are accounted for from the effective date of acquisition. Under Financial Reporting Standard 6, merger accounting has been adopted as the basis for consolidation.

(c) Turnover

Turnover relates to unit sales and the sale of ancillary products.

(d) Tangible fixed assets

Fixed assets are stated at cost less accumulated depreciation. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset by equal monthly instalments over its expected useful life, as follows:-

Leasehold improvements	10% per annum
Motor vehicles	15% per annum
Office furniture and equipment	6-15% per annum
Computer equipment	20-33% per annum

(e) Stock

Stock is valued at the lower of cost and net realisable value.

(f) Other income

Grants receivable from the Israeli Government are recognised at the time the Company is entitled to such grants. These revenue grants are shown as other income.

(g) Reporting currency

The majority of the Group's turnover is generated in US Dollars. For the purpose of reporting requirements, the financial information has been reported in US Dollars. The year end rate used was £1 to \$1.95910 (2005: £1 to \$1.72080)

(h) Research and development

All expenditure relating to research and development expenditure is expensed directly to the profit and loss account.

(i) Foreign Currency

The results of the parent company are translated into US Dollars at the average rate of exchange for the year. The assets and liabilities of the parent company are translated into US Dollars at the rate of exchange ruling at the year end. Currency translation adjustments on exchange are included in the profit and loss account.

(j) Share based payments

FRS 20 requires the Group to recognise an expense in respect of the granting over shares to employees and directors. This expense, which is calculated by reference to the fair value of the options granted, is recognised on a straight line basis over the vesting period based on the Group's estimate of options that will eventually vest. The Directors have used the Black Scholes model to estimate the value of options granted in the current and prior periods.

2. BUSINESS SEGMENT ANALYSIS

The turnover, loss on ordinary activities before taxation and net assets of the Group are attributable to one activity, that of developing and selling video surveillance equipment.
